

PRODUCT INFORMATION

Target	MSMP
Synonyms	PSMP
Description	Recombinant Human MSMP Protein with C-terminal human Fc tag
Delivery	In Stock
Uniprot ID	Q1L6U9
Expression Host	HEK293
Tag	C-Human Fc Tag
Molecular Characterization	MSMP(Ser36-Ser139) hFc(Glu99-Ala330)
Molecular Weight	The protein has a predicted molecular mass of 37.3 kDa after removal of the signal peptide. The apparent molecular mass of MSMP-hFc is approximately 35-55 kDa due to glycosylation.
Purity	The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.
Formulation & Reconstitution	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage & Shipping	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
Background	This gene encodes a member of the beta-microseminoprotein family. Members of this protein family contain ten conserved cysteine residues that form intra-molecular disulfide bonds. The encoded protein may play a role in prostate cancer tumorigenesis. [provided by RefSeq, Jan 2011]
Usage	Research use only
Conjugate	Unconjugated
