

**PRODUCT INFORMATION**

<b>Target</b>	BDNF
<b>Synonyms</b>	Brain-Derived Neurotrophic Factor;BDNF;Abrineurin
<b>Description</b>	Recombinant Human Brain-Derived Neurotrophic Factor is produced by our E.coli expression system and the target gene encoding His129-Arg247 is expressed.
<b>Delivery</b>	In Stock
<b>Uniprot ID</b>	P23560
<b>Expression Host</b>	E.coli
<b>Tag</b>	
<b>Molecular Characterization</b>	Not available
<b>Molecular Weight</b>	13 KDa
<b>Purity</b>	Greater than 95% as determined by reducing SDS-PAGE.
<b>Formulation &amp; Reconstitution</b>	Lyophilized from a 0.2 $\mu$ m filtered solution of 20mM PB, 250mM NaCl, pH 7.2.
<b>Storage&amp;Shipping</b>	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
<b>Background</b>	Brain-Derived Neurotrophic Factor (BDNF) is a member of the neurotrophin family. Along with other structurally related neurotrophic factors NGF, NT-3 and NT-4, BDNF binds with high affinity to the TrkB kinase receptor. It also binds with the LNGFR (for low-affinity nerve growth factor receptor, also known as p75). BDNF promotes the survival, growth and differentiation of neurons. It serves as a major regulator of synaptic transmission and plasticity at adult synapses in many regions of the CNS. BDNF expression is altered in neurodegenerative disorders such as Parkinson's and Alzheimer's disease.
<b>Usage</b>	Research use only
<b>Conjugate</b>	Unconjugated

Figure 1. Greater than 95% as determined by reducing SDS-PAGE.

Figure 2. Immobilized Human TrkB-His at 2 $\mu$ g/mL (100  $\mu$ l/well) can bind Human BDNF\*: Biotinylated by NHS-biotin prior to testing. The ED50 of Human BDNF\* is 47.58 ng/ml.
