

PRODUCT INFORMATION

| | |
|---|---|
| Tag | C-Flag&Strep Tag |
| Target | NTSR2 |
| Synonyms | NTR2 |
| Description | Human NTSR2-Strep full length protein-synthetic nanodisc |
| Delivery | In Stock |
| Uniprot ID | O95665 |
| Expression Host | HEK293 |
| Protein Families | Druggable Genome, GPCR, Transmembrane |
| Protein Pathways | Neuroactive ligand-receptor interaction |
| Molecular Weight | The human full length NTSR2-Strep protein has a MW of 45.4 kDa |
| Formulation & Reconstitution | Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. |
| Storage&Shipping | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. |
| Background | The protein belongs to the G protein-coupled receptor family that activate a phosphatidylinositol-calcium second messenger system. Binding and pharmacological studies demonstrate that this receptor binds neuropeptides such as neuropeptide Y, neuropeptide FF, and neuropeptide K, as well as several other ligands already described for neuropeptide Y receptor. However, unlike neuropeptide Y receptor, this gene recognizes, with high affinity, levocabastine, a histamine H1 receptor antagonist previously shown to compete with neuropeptides for low-affinity binding sites in brain. These activities suggest that this receptor may be of physiological importance and that a natural agonist for the receptor may exist. |
| Usage | Research use only |
| Conjugate | Unconjugated |

ELISA assay to evaluate NTSR2-Strep-Nanodisc
0.2 μ g Human NTSR2-Strep-Nanodisc per well

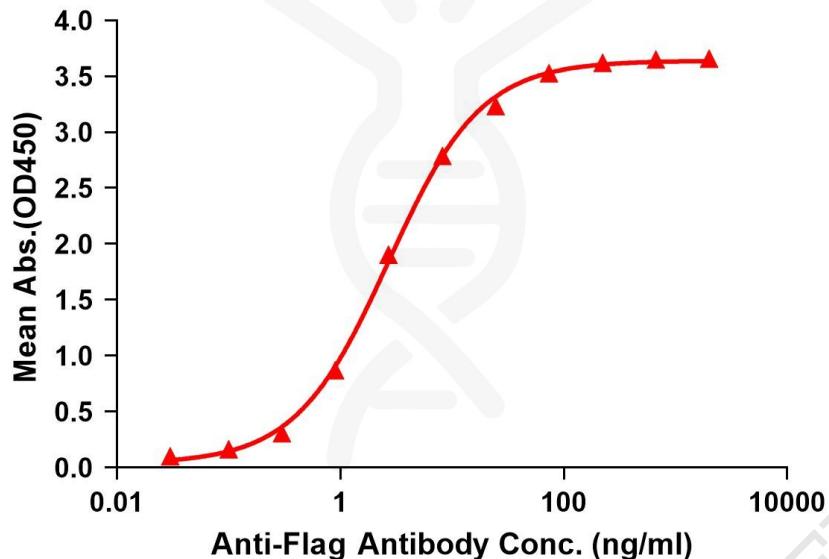

Figure 1. Elisa plates were pre-coated with C-Flag&Strep Tag NTSR2-Strep-Nanodisc (0.2 μ g/per well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with NTSR2-Strep-nanodisc is 2.690ng/ml.

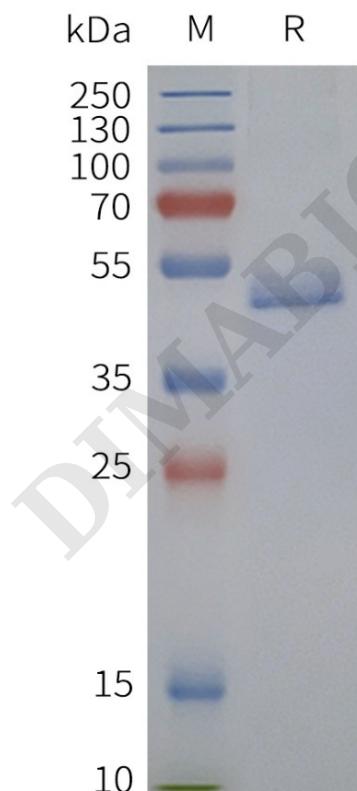

Figure 2. Human NTSR2-Strep-Nanodisc, C-Flag&Strep Tag on SDS-PAGE
