

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

OR52D1 **Target Synonyms** OR11-43

Human OR52D1-Strep full length protein-**Description**

synthetic nanodisc

Delivery 6~8weeks **Uniprot ID** Q9H346 **Expression Host HEK293**

Protein Families Transmembrane

Protein Pathways Olfactory transduction

The human full length OR52D1-Strep protein has **Molecular Weight**

a MW of 35.1 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and

hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor

genes and proteins for this organism is independent of other organisms.

Usage Research use only Conjugate Unconjugated
