

## **PRODUCT INFORMATION**

| <b>-</b>                        |   |
|---------------------------------|---|
| Tag                             | C-Flag&Strep Tag  |
| Target                          | P2RY4   |
| Synonyms                        | NRU, P2P, P2Y4, UNR   |
| Description                     | Human P2RY4-Strep full length protein-synthetic nanodisc  |
| Delivery                        | 6~8weeks  |
| Uniprot ID                      | P51582  |
| <b>Expression Host</b>          | HEK293  |
| <b>Protein Families</b>         | Druggable Genome,   |
| Protein Pathways                | GPCRDB Class A Rhodopsin-like,Nucleotide<br>GPCRs,  |
| Molecular Weight                | The human full length P2RY4-Strep protein has a MW of 41 kDa  |
| Formulation &<br>Reconstitution | Lyophilized from nanodisc solubilization buffer (20<br>mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5%<br>– 8% trehalose is added as protectants before<br>lyophilization. Please see Certificate of Analysis<br>for specific instructions of reconstitution.  |
| Storage & Shipping              | Store at -20°C to -80°C for 12 months in<br>lyophilized form. After reconstitution, if not<br>intended for use within a month, aliquot and store<br>at -80°C (Avoid repeated freezing and thawing).<br>Lyophilized proteins are shipped at ambient<br>temperature.  |
| Background                      | The product of this gene belongs to the family of<br>G-protein coupled receptors. This family has<br>several receptor subtypes with different<br>pharmacological selectivity, which overlaps in<br>some cases, for various adenosine and uridine<br>nucleotides. This receptor is responsive to uridine<br>nucleotides, partially responsive to ATP, and not<br>responsive to ADP. [provided by RefSeq, Jul 2008] |
| Usage                           | Research use only   |
| Conjugate                       | Unconjugated  |
|                                 |   |
