

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

P2RY4 **Target**

Synonyms NRU, P2P, P2Y4, UNR

Human P2RY4-Strep full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks

Uniprot ID P51582 **Expression Host HEK293**

Protein Families Druggable Genome,

GPCRDB Class A Rhodopsin-like, Nucleotide **Protein Pathways**

GPCRs,

The human full length P2RY4-Strep protein has a **Molecular Weight**

MW of 41 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in

lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

The product of this gene belongs to the family of G-protein coupled receptors. This family has several receptor subtypes with different pharmacological selectivity, which overlaps in some cases, for various adenosine and uridine purcleatides. This receptor is recognized to uridine

nucleotides. This receptor is responsive to uridine nucleotides, partially responsive to ATP, and not responsive to ADP. [provided by RefSeq, Jul 2008]
