

## **PRODUCT INFORMATION**

**SLPI Target** 

ALP;BLPI;HUSI-1;MPI;WAP4;WFDC4 **Synonyms** 

Recombinant human SLPI protein with C-terminal **Description** 

human Fc tag

**Delivery** In Stock **Uniprot ID** P03973 **Expression Host HEK293** 

Tag C-Human Fc Tag

Molecular

Storage & Shipping

**Background** 

SLPI(Ser26-Ala132) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of

37.9 kDa after removal of the signal peptide. The apparent molecular mass of SLPI-hFc is **Molecular Weight** 

approximately 35-55 kDa due to glycosylation. The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a secreted inhibitor which protects epithelial tissues from serine proteases. It is found in various secretions including seminal plasma, cervical mucus, and bronchial secretions, and has affinity for trypsin, leukocyte elastase, and cathepsin G. Its inhibitory effect contributes

to the immune response by protecting epithelial surfaces from attack by endogenous proteolytic

enzymes. This antimicrobial protein has antibacterial, antifungal and antiviral activity. [provided by RefSeq, Nov 2014]

Usage Research use only

Unconjugated Conjugate
