

PRODUCT INFORMATION

STAB1 **Target**

Synonyms Stabilin-1;FEEL-1;MS-1 antigen

Recombinant human STAB1 protein with C-**Description**

terminal human Fc tag

Delivery In Stock **Uniprot ID Q9NY15 Expression Host HEK293**

Tag C-Human Fc Tag

Molecular

Background

STAB1(Asp638-Leu1024) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of

66.7 kDa after removal of the signal peptide. The apparent molecular mass of STAB1-hFc is **Molecular Weight**

approximately 70-100 kDa due to glycosylation.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & Reconstitution

- 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a large, transmembrane receptor protein which may function in

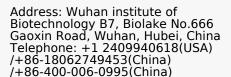

angiogenesis, lymphocyte homing, cell adhesion, or receptor scavenging. The protein contains 7 fasciclin, 16 epidermal growth factor (EGF)-like, and 2 laminin-type EGF-like domains as well as a C-type lectin-like hyaluropan-binding Link module. The protein is primarily expressed on sinusoidal endothelial cells of liver, spleen, and lymph node. The receptor has been shown to endocytose

ligands such as low density lipoprotein, Gram-positive and Gram-negative bacteria, and

advanced glycosylation end products. Supporting its possible role as a scavenger receptor, the protein rapidly cycles between the plasma membrane and early endosomes. [provided by RefSeq, Jul 2008]

Usage Research use only Conjugate Unconjugated
