

PRODUCT INFORMATION

Tag	N-His, C-Strep Tag
Expression Host	E.coli
Target	STEAP1
Description	Human STEAP1 cell-free full length protein-Detergent
Synonyms	PRSS24; STEAP
Uniprot ID	Q9UHE8
Protein Families	Transmembrane
Protein Pathways	N/A
Molecular Weight	The human STEAP1 cell-free full length protein-Detergent has a MW of 43.9kDa
Delivery	1 week
Formulation & Reconstitution	Liquid, 50mMHepes, 150mMNaCl, 0.05%Brij35, pH7.5
Sterility	Products are supplied non-sterile. For cell culture applications, dilute in appropriate medium and sterile-filter (0.22 µm) prior to use.
Storage&Shipping	Store at -80°C, Ship on dry ice.
Purity	>80%
Background	STEAP1 is a cell-surface biomolecule composed by sixtransmembrane domains connected by intra- and extracellular loops. It is commonly found overexpressed in several types of cancers, namely in PCa, and is preferentially located at the tight or gap junctions. However, in nontumoural tissues and vital organs, STEAP1 protein presents low or absent expression, unveiling considerable specificity for cancer environment. Taking into account STEAP1 predicted transmembrane topology and cellular localization, it has been hypothesized that STEAP1 may play an important role as a transporter protein and can be involved in intercellular communication.
Usage	Research use only
Conjugate	Unconjugated
