

## **PRODUCT INFORMATION**

C-Flag Tag Tag STEAP2 **Target** 

**Synonyms** IPCA1; PCANAP1; PUMPCn; STAMP1; STMP Human STEAP2 full length protein-synthetic **Description** 

nanodisc **Delivery** In Stock **Uniprot ID** Q8NFT2 **Expression Host HEK293** 

**Protein Families** Transmembrane

**Protein Pathways** N/A

**Background** 

The human full length STEAP2 protein has a MW **Molecular Weight** 

of 56.1 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping Lyophilized proteins are shipped at ambient

temperature.

A member of the STEAP family and encodes a multi-pass membrane protein that localizes to the Golgi complex, the plasma membrane, and the vesicular tubular structures in the cytosol. A highly similar protein in mouse has both ferrireductase and cupric reductase activity, and

stimulates the cellular uptake of both iron and copper in vitro. Increased transcriptional expression of the human gene is associated with

prostate cancer progression. Alternate transcriptional splice variants, encoding different

isoforms, have been characterized.

**Usage** Research use only

Conjugate Unconjugated

## ELISA assay to evaluate STEAP2-Nanodisc 0.2μg Human STEAP2-Nanodisc per well

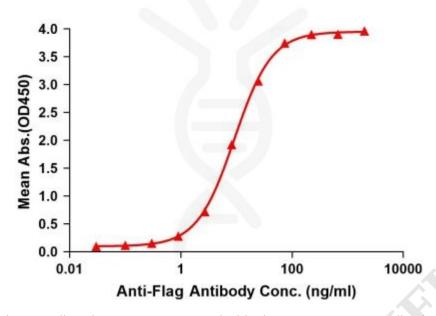

Figure 1. Elisa plates were pre-coated with Flag Tag STEAP2-Nanodisc ( $0.2\mu g/per$  well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with STEAP2-Nanodisc is 9.198ng/ml.
