

PRODUCT INFORMATION

Tag C-Flag Tag
Target TMCC3
Synonyms N/A

DescriptionHuman TMCC3 full length protein-synthetic

Delivery In Stock
Uniprot ID Q9ULS5
Expression Host HEK293

Protein Families Transmembrane

Protein Pathways N/A

Molecular Weight

The human full length TMCC3 protein has a MW of

53.8 kDa

Formulation & Reconstitution Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Storage & Shipping intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

This protein belongs to the the transmembrane and coiled-coil domain (TMCC) family, which

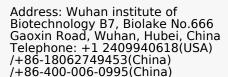

shares common structural motifs (two transmembrane domains and two coiled-coil

domains). TMCC3 was isolated as a novel gene isolated from human brain, and later became known as a novel gene up-regulated in the developing brain, especially in the ventral

tegmentum. There is no resolved structure or defined function.

Usage Research use only

Conjugate Unconjugated

ELISA assay to evaluate TMCC3-Nanodisc 0.2µg Human TMCC3-Nanodisc per well

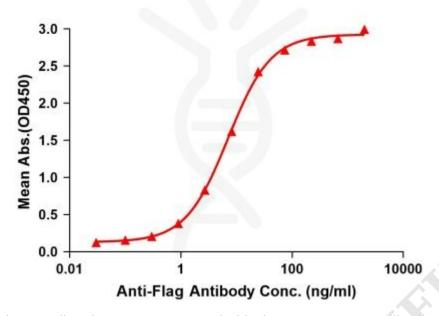

Figure 1. Elisa plates were pre-coated with Flag Tag TMCC3-Nanodisc ($0.2\mu g/per$ well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with TMCC3-Nanodisc is 7.101 ng/ml.
