

## **PRODUCT INFORMATION**

TMIGD2 **Target** 

**Synonyms** CD28 homolog;IGPR-1

Recombinant human TMIGD2 protein with C-**Description** 

terminal human Fc tag

**Delivery** In Stock **Uniprot ID** Q96BF3 **Expression Host HEK293** 

Tag C-Human Fc Tag

Molecular

Storage & Shipping

Purity

TMIGD2(Leu23-Gly150) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of 40.1 kDa after removal of the signal peptide. The

**Molecular Weight** apparent molecular mass of TMIGD2-hFc is approximately 55-70 kDa due to glycosylation.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

Plays a role in cell-cell interaction, cell migration, and angiogenesis. Through interaction with

HHLA2, costimulates T-cells in the context of TCR-**Background** 

mediated activation. Enhances T-cell proliferation and cytokine production via an AKT-dependent signaling cascade.[UniProtKB/Swiss-Prot Function]
