

PRODUCT INFORMATION

C-Flag Tag Tag

TRFR Target

Synonyms CHNG7, TRH-R

Human TRFR full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** P34981 **Expression Host HEK293**

Protein Families GPCR, Transmembrane, Druggable Genome,

Protein Pathways GPCRDB Class A Rhodopsin-like, Peptide GPCRs,

The human full length TRFR protein has a MW of **Molecular Weight**

45.1kDa Lyophilized from nanodisc solubilization buffer (20

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

Formulation & Reconstitution for specific instructions. Do not use solvents with a pH below 6.5 or those containing high

concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

This gene encodes a G protein-coupled receptor for thyrotropin-releasing hormone (TRH). Upon binding to TRH, this receptor activates the inositol

Email: info@dimabio.com Website: www.dimabio.com

phospholipid-calcium-protein kinase C transduction pathway. Mutations in this gene have been associated with generalized

thyrotropin-releasing hormone resistance. [provided by RefSeq, Sep 2011]

Usage Research use only

Conjugate Unconjugated
