

PRODUCT INFORMATION

C-Flag Tag Tag TRPC3 **Target**

Synonyms SCA41, TRP3

Human TRPC3 full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** Q13507 **Expression Host HEK293**

Protein Families Ion Channels: Transient receptor potential

Protein Pathways

Background

The human full length TRPC3 protein has a MW of **Molecular Weight**

96kDa

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

Lyophilized from nanodisc solubilization buffer (20

Formulation & Reconstitution for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

témperature.

The protein encoded by this gene is a membrane protein that can form a non-selective channel permeable to calcium and other cations. The encoded protein appears to be induced to form channels by a receptor tyrosine kinase-activated phosphatidylinositol second messenger system

and also by depletion of intracellular calcium stores. Two transcript variants encoding different isoforms have been found for this gene. [provided
