

PRODUCT INFORMATION

Target TTR

CTS; TTN; ATTR; CTS1; PALB; TBPA; HEL111; **Synonyms**

HsT2651

Recombinant human TTR Protein with C-terminal **Description**

human Fc tag

Delivery In Stock **Uniprot ID** P02766 **Expression Host** HFK293

C-Human Fc tag Tag

Molecular

Purity

Background

TTR(Gly21-Glu147) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of

39.9 kDa after removal of the signal peptide. The **Molecular Weight**

apparent molecular mass of TTR-hFc is approximately 35-55 kDa due to glycosylation.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation & lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes one of the three prealbumins, which include alpha-1-antitrypsin, transthyretin and orosomucoid. The encoded protein, transthyretin, is a homo-tetrameric carrier

protein, which transports thyroid hormones in the plasma and cerebrospinal fluid. It is also involved in the transport of retinol (vitamin A) in the plasma by associating with retinol-binding protein. The protein may also be involved in other intracellular processes including proteolysis,

nerve regeneration, autophagy and glucose homeostasis. Mutations in this gene are

associated with amyloid deposition, predominantly affecting peripheral nerves or the heart, while a small percentage of the gene mutations are non-amyloidogenic. The mutations

are implicated in the etiology of several diseases, including amyloidotic polyneuropathy, euthyroid hyperthyroxinaemia, amyloidotic vitreous opacities, cardiomyopathy, oculoleptomeningeal

amyloidosis, meningocerebrovascular amyloidosis and carpal tunnel syndrome. [provided by RefSeq,

Aug 2017]

Usage Research use only

Conjugate Unconjugated

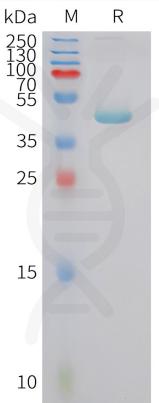

Figure 1. Human TTR Protein, hFc Tag on SDS-PAGE under reducing condition.

Human TTR, hFc Tagged Protein ELISA

0.2 μg of Human TTR Protein, hFc tagged protein per well

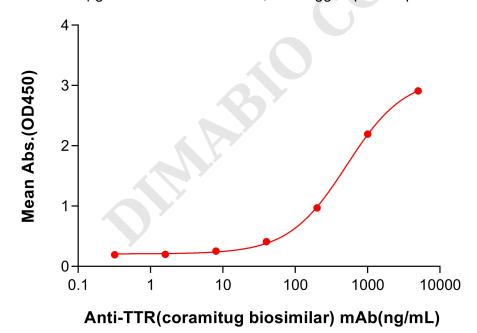

Figure 2. ELISA plate pre-coated by 2 μ g/mL (100 μ L/well) Human TTR Protein, hFc Tag (PME101430) can bind Anti-TTR(coramitug biosimilar) mAb (BME100460) in a linear range of 40–200 ng/mL.In order to specifically detect BME100460, mouse anti-human Fab-specific antibody was used as detection antibody.
