

PRODUCT INFORMATION

Target IL4RA

II4r; CD124 **Synonyms**

Recombinant mouse IL4RA protein with C-Description

terminal 10×His tag

Delivery In Stock **Uniprot ID** P16382 **Expression Host HEK293**

Tag C-10×His tag

Molecular

Purity

Background

Mouse IL4RA(Ile26-Arg233) 10×His tag Characterization

The protein has a predicted molecular mass of **Molecular Weight** 25.8 kDa after removal of the signal peptide.

The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation & lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

Predicted to enable interleukin-4 receptor activity. Involved in positive regulation of

chemokine production; positive regulation of coldinduced thermogenesis; and positive regulation of macrophage activation. Acts upstream of or within several processes, including defense response to protozoan; negative regulation of Thelper 1 cell differentiation; and positive regulation of immune effector process. Predicted to be located in centriolar satellite; extracellular space; and nucleoplasm. Predicted to be part of receptor complex. Predicted to be active in

external side of plasma membrane. Is expressed in several structures, including adrenal medulla; early conceptus; hemolymphoid system; medulla oblongata basal plate mantle layer; and reproductive system. Used to study asthma. Human ortholog(s) of this gene implicated in several diseases, which are the study as the several diseases.

conjunctivitis; multiple sclerosis (multiple); renal
