

PRODUCT INFORMATION

Target	IL6
Synonyms	Il-6
Description	Recombinant mouse IL6 protein with C-terminal human Fc tag
Delivery	In Stock
Uniprot ID	P08505
Expression Host	HEK293
Tag	C-Human Fc Tag
Molecular Characterization	Mouse IL6(Phe25-Thr211) hFc(Glu99-Ala330)
Molecular Weight	The protein has a predicted molecular mass of 47.9 kDa after removal of the signal peptide. The apparent molecular mass of mIL6-hFc is approximately 35-55 kDa due to glycosylation.
Purity	The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.
Formulation & Reconstitution	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage & Shipping	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
Background	This gene encodes a member of the interleukin family of cytokines that have important functions in immune response, hematopoiesis, inflammation and the acute phase response. The ectopic overexpression of the encoded protein in mice results in excessive plasma cells in circulation, leading to death. Mice lacking the encoded protein exhibit abnormalities in hepatic acute phase response, some immune mechanisms, bone resorption in response to estrogen, liver regeneration and wound healing. Alternative splicing results in multiple transcript variants encoding different isoforms. [provided by RefSeq, Sep 2015]
Usage	Research use only
Conjugate	Unconjugated
