**Applications** 

**Background** 

**DIMA Disclaimer** 

## **PRODUCT INFORMATION**

Clone ID DM6 **BCMA Target** TNFRSF17 **Synonyms Host Species** Rabbit

PE-conjugated Anti-BCMA antibody(DM6); Rabbit Description

mAb **Delivery** In Stock **Uniprot ID** Q02223 Rabbit IgG IgG type Clonality Monoclonal Reactivity Human

Recommended Flow Cyt 1:400 **Dilutions** 

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Formulation & Liquid PBS with 0.05% Proclin300, 1% BSA Reconstitution

Flow Cyt

Storage & Shipping Store at 2°C-8°C for 6 months

The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor is preferentially expressed in mature B lymphocytes; and may be important for B cell development and autoimmune response. This receptor has been shown to specifically bind to the tumor necrosis factor (ligand) superfamily; member 13b (TNFSF13B:TALL-1:BAFF); and to

lead to NF-kappaB and MAPK8:JNK activation. This receptor also binds to various TRAF family members; and thus may transduce signals for cell survival and proliferation. [provided by RefSeq;

Jul 2008]

Usage Research use only Conjugate PE-conjugated

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are
