

## **PRODUCT INFORMATION**

**Clone ID** 3G5 **GIPR Target Synonyms** PGQTL2 **Host Species** Rabbit

PE-conjugated Anti-GIPR antibody(3G5); IgG1 Description

Chimeric mAb

**Delivery Under Development** 

**Uniprot ID** P48546

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

Flow Cyt 1:100 **Dilutions** 

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Formulation & Reconstitution

**Background** 

**DIMA Disclaimer** 

Liquid PBS with 0.05% Proclin300, 1% BSA

Storage & Shipping Store at 2°C-8°C for 6 months

> This gene encodes a G-protein coupled receptor for gastric inhibitory polypeptide (GIP), which was originally identified as an activity in gut extracts that inhibited gastric acid secretion and gastrin release, but subsequently was demonstrated to stimulate insulin release in the presence of elevated glucose. Mice lacking this gene exhibit higher blood glucose levels with impaired initial

> insulin response after oral glucose load. Defect in this gene thus may contribute to the

pathogenesis of diabetes. [provided by RefSeq, Oct 2011]

**Usage** Research use only

PE-conjugated Conjugate

> All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are actively scrutinizing all patent application to ensure no IP infringement.
